

Lerin Elizabeth Paul

Software Development Intern | B. Tech Computer Science & Engineering Student

Kerala, India

in/lerin-elizabeth-paul-2269a2381|lerinelizabethpaul@gmail.com

About Me

I am a dedicated Computer Science and Engineering student and a driven programmer with a deep passion for software development and database management. Guided by an insatiable eagerness to learn, I view coding as the perfect intersection of logical problem-solving and creative execution—turning complex, real-world challenges into elegant, functional software. Beyond my foundational coding strengths, my core asset is my high adaptability and rapid learning curve, which allow me to quickly master emerging tech stacks and data systems. Combining a strong analytical mindset with a proactive, growth-oriented attitude, I am fully equipped to channel my potential into an impactful career in core software engineering, continuously building scalable solutions and expanding my technical expertise.

Technical & Core Skills

Programming & Databases

- **Core / Proficient:** Python, C, Relational Database Design
- **Familiar / Actively Learning:** Java, MySQL, Advanced Data Structures & Algorithms (DSA)

Professional Competencies

- **Core / Proficient:** Logical Problem-Solving, Cross-Functional Teamwork, Event Coordination & Management
- **Familiar / Actively Learning:** Technical Logic Formulation, Scalable Solution Design

Projects & Professional Experience

Software Engineering Internship — Real-Time Projects

- **Role:** Software Development Intern (*NDA Protected*)
- **Core Tech Stack:** Python (Django), PHP, Backend Architectures
- **Project Overview:** Contributed to the optimization, maintenance, and quality assurance of production-ready, real-time web applications for active client systems.
- **Key Responsibilities & Impact:**
 - **Web Application Debugging (Python/Django):** Diagnosed and resolved backend bugs, logic errors, and performance bottlenecks within active Django frameworks to ensure platform stability.
 - **Application Testing:** Designed and executed technical testing workflows to validate feature functionality and improve overall end-user reliability.

- **Backend Development (PHP):** Developed and optimized server-side logic and data architectures using PHP to support seamless web platform scalability.

Mindbridge — Digital Health Ecosystem

- **Role:** Conceptual & Technical Design Lead
- **Core Focus:** AI-driven emotional tracking, wearable biometric synchronization, and systems architecture.
- **Project Overview:** Conceived and designed the framework for a digital health ecosystem aimed at modernizing mental wellness. The platform integrates artificial intelligence to track emotional patterns and syncs seamlessly with wearable biometrics to capture real-world health data.
- **Key Contributions:**
 - Formulated the end-to-end technical abstract and feature ecosystem.
 - Designed the system logic for integrating machine learning models with live biometric data streams.
 - Developed the core structural frameworks for database logging and backend workflow mapping.

Hostel Management System

- **Role:** Developer (*Academic/School Project*)
- **Core Tech Stack:** Python, MySQL
- **Project Overview:** Developed a desktop application to automate daily hostel operations, migrating manual workflows into a structured database system.
- **Key Features:**
 - **Database Design:** Created a localized MySQL schema to manage student records, room allocations, and fee tracking.
 - **Python Connectivity:** Integrated database connectors to execute real-time SQL queries directly from the UI.
 - **Data Integrity:** Programmed backend validation rules to monitor room availability and prevent double-allocations.
 - **Search Engine:** Built an instant query feature for looking up student files via unique primary keys.

Education

Bachelor of Technology (B.Tech) in Computer Science & Engineering

Mar Baselios Institute of Technology and Science (MBITS), Kothamangalam

- **Timeline:** 2025 – Present

- **Current Status:** Second Year / Third Semester (*Commencing Next Month*)
- **Core Focus Areas:** Core Programming Logic, Relational Database Foundations, Computational Mathematics, and Fundamental Software Engineering Principles.

Higher Secondary Education (Class XII)

Nirmala Public School, Muvattupuzha | CBSE — *Graduated: 2025*

- **Core Stream:** Science (Computer Science Focus)
- **Key Focus:** Advanced Mathematics, Foundational Computer Science (Python & MySQL Database Logic), and Physics.

Secondary School Education (Class X)

St. George Public School, Mannoor | CBSE — *Graduated: 2023*

- **Key Focus:** General Academics, Mathematics, and Foundational Sciences.

Leadership & Volunteer Experience

Student Volunteer — KARNAK Campus Techno-Cultural Festival

- Contributed to the planning, crowd logistics, and ground coordination of a large-scale, multi-departmental campus festival.
- Collaborated within cross-functional student teams to ensure seamless event execution, schedule management, and participant engagement.
- Developed strong interpersonal and crisis-management skills by adapting to fast-paced, real-time event operational requirements.
